DETAILED ACTION

1. Prior to setting out the restriction claims 8 and 9 are not included in the restriction because they are directed to non-statutory subject matter by including the term "use". It is not clear if the claims are directed to products, methods of expression or methods of treating or some other group.

2. It is also noted that although it appears that the application is in sequence compliance, it is requested that the SEQ ID NOs for those sequences in the Figures and in the claims be added to the Figures and the claims so a proper search can be performed upon election.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1, and 5-7 in part, drawn to a chimeric molecule binding to GD3 with variable sequences of the MB3.6 antibody, classified in class 530, subclass 387.3.
 - II. Claims 2, and 5-7 in part, drawn to a chimeric molecule binding to PSMA with variable sequences of the 3D8 antibody, classified in class 530, subclass 387.3.

Art Unit: 1642

- III. Claims 3, and 5-7 in part, drawn to a chimeric molecule binding to PSMA with variable sequences of the 4D4 antibody, classified in class 530, subclass 387.1.
- IV. Claims 4, and 5-7 in part, drawn to a chimeric molecule binding to PSMA with variable sequences of the 3E11 antibody, classified in class 530, subclass 387.1.

4. The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are distinct because they bind different antigens and have distinct structures. In the instant case the antibodies of Group I bind GD3 while the antibodies of Groups II-IV bind PSMA. In addition, the antibodies of each Group are distinct because each antibody has a distinct amino acid sequence and a search of one antibody would not result in a search of the others. Thus, inventions I-IV are patentably distinct.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different searches in the patent literature, restriction for examination purposes as indicated is proper.
